

## APPLICATIONS

DC voltage filtering for:

- DC link
- Resonant filtering
- Active correction (FACTS, UPFC, DVR...)
- Speed converters (drives and traction)
- Windmills
- Substation

## PACKAGING

Rectangular stainless steel case sandblasted. Grounding is via a threaded screw located on the cover of the case.

## ELECTRICAL CHARACTERISTICS – STANDARD PRODUCTS

Capacitance range C <sub>n</sub>	610µF to 15600µF
Tolerance on C <sub>n</sub>	±10%
DC voltage range	1200V to 5000V
Maximum hot-spot temperature	85°C
Life duration at nominal voltage and 70°C hot-spot temperature	100000 hours
Stray inductance	<400nH
Test voltage between terminals	1.5V <sub>n</sub> during 10s
Test voltage between short terminals and case	10kV <sub>rms</sub> (at 50Hz during 1mn)
Standard reference	Conforms with IEC 61071 and 61881, 61373, 60068 and 60077

## ELECTRICAL CHARACTERISTICS – CUSTOM PRODUCTS

Capacitance range C <sub>n</sub>	83µF to 15300µF
Tolerance on C <sub>n</sub> (±5% or ±2% available for specific requirements)	±10%
DC voltage range	1200V to 6000V
Maximum hot-spot temperature	85°C
Life duration at nominal voltage and 70°C hot-spot temperature	100,000 hours
Stray inductance	200nH to 430nH down to 40nH
On option low inductance for IGBT and other applications	
Test voltage between terminals	1.5V <sub>n</sub> during 10s
Test voltage between short terminals and case	10kV <sub>rms</sub> (at 50Hz during 1mn)
Standard reference	Conforms with IEC 61071, 61881 and 61373, IEC 60068 and IEC 60077

# Medium Power Film Capacitors

## FFLC Design

### DC FILTERING

### APPLICATIONS

The FFLC is specifically designed for DC filtering, low reactive power.

### PACKAGING

Rectangular resin filled aluminum case.

FFLC capacitors meet the level 2 requirement of the fire behavior standard NF F 16 102.

### PRESENTATION

Non-painted rectangular resin filled aluminium case

4 x M10 terminals\*

**NEW** Available with M10 X 12 female terminal upon request  
(last codification digit "--" become in that case "JE")

### ELECTRICAL CHARACTERISTICS

Capacitance range C <sub>n</sub>	1120µF to 8800µF (other values available upon request)
Tolerance on C <sub>n</sub>	±10%
Rated DC voltage V <sub>n</sub> dc	680 to 1200 V
Maximum rms current I <sub>rms</sub> max	140 Arms to 300 Arms
Stray inductance L <sub>s</sub> *	28 nH to 40 nH

\*Very low stray inductance for high frequency applications on request.

# Medium Power Film Capacitors

## FFVE/FFVI Male and Female Connections

The FFV capacitor is specifically designed for DC filtering, low reactive power.

The series uses a non-impregnated metallized polypropylene or polyester dielectric, which features a controlled self-healing process, specially treated to have a very high dielectric strength in operating conditions up to 105°C.

The FFV special design gives this series a very low level of stray inductance (18 nH to 40 nH).

Furthermore, the performance levels of the FFVE capacitor makes them a very interesting alternative to electrolytic technology, because they can withstand much higher levels of surge voltage, very high rms current ratings, and longer lifetimes.

### PACKAGING

Self-extinguishing plastic case (V0 = in accordance with UL 94) filled thermosetting resin.

Self-extinguishing thermosetting resin (V0 = in accordance with UL 94; I3F1 = in accordance with NF F 16-101).

FFVE capacitors meet the Level 2 requirement of the fire behavior standard NF F 16-102.

# DISFIM High Voltage Film Capacitors

Controlled self-healing film capacitor technology, is ideal for discharge applications. DISFIM capacitors range from 2kV to 75kV and the maximum energy per can is 150kJ. Each capacitor is divided into several million elementary capacitances. The weak points in the dielectric are insulated and the capacitor continues to work without a short circuit or risk of explosion. They are designed to lose less than 5% of their capacitance during their lifetime.

# Medium Power Film Capacitors

## FPX

### APPLICATIONS

Protection of thyristors.  
Protection of gate turn-off thyristor (G.T.O.).  
Clamping (Secondary snubber).

### TECHNOLOGY

Metalized polypropylene dielectric capacitor with controlled self-healing.

Reinforced metallization developed for high impulse currents.  
Axial connections specially developed to reduce series inductance and to provide rigid mechanical mounting.

### PACKAGING

Cylindrical in plastic case filled with thermosetting resin.  
Outputs: threaded inserts either M6 or M8.

### PROTECTION
