Description

M/A-COM's MAFLCC0007 is an IC-based monolithic low pass filter in a low cost SOIC-8 plastic package. The filter is ideally suited for applications where small size, low cost and low loss are required.

Typical applications include base station switching networks and portable phones where size and PCB real estate are at a premium. Available in tape and reel.

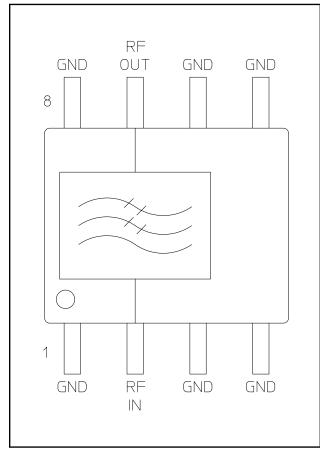

The MAFLCC0007 is fabricated using a passiveintegrated circuit process. The process features fullchip passivation for increased performance and reliability.
